I'm a software engineer with 5+ years of experience building web and mobile applications. Combines hands-on software development, teamwork and R&D in agentic coding.

Technical skills

Languages	JavaScript, TypeScript, HTML5, CSS/SCSS, Python, Java, C/C++, SQL
Frameworks	React, React Native, Angular, Vue, Next.js, Redux Toolkit, Tailwind, Ionic, GraphQL
Agentic coding	Codex, Claude Code
Tools	Git, Docker, Postman, CI/CD, Figma
Cloud, platforms and databases	Microsoft Azure, AWS, Liquibase, Firebase, SharePoint, SaaS, DevOps
Development, quality and architecture	Node.js, Redux, RTK Query, Mantine, FullCalendar, Vitest, Playwright, Zod, Storybook, Microfrontends, Design systems, OpenAI API, API integration, UX design, IoT, Data analysis, Dashboard, Responsive design, Back-office development, Software integration, Troubleshooting, Mobile development, MVP, Hybrid apps, Technical leadership, Product development, Startup

Education

International Training Center, ILO

November 2024 - October 2025

Turin, Italy

1st level Master Degree: AI, Technology & Public Policy

University of Florence

September 2017 - May 2021

Florence, Italy

Bachelor of Science: Computer Engineering

Professional experience

Citybeat

August 2026 - Present

Freelance software engineer · CTO founder | Milan

I collaborate externally on Citybeat's technical development, with responsibilities toward a future CTO and co-founder role.
The app helps users discover places their connections plan to visit, including day and time, and explore popular places within a selected time window.

React Native, Go, Figma, Technical leadership, Product development, Startup

Exe Digital

February 2026 - Present

Software Engineer | Milan

I deepened my work with Codex and Claude Code, release and DevOps processes, SaaS architecture, and SaaS database and software management on Microsoft Azure, including Liquibase.

> **StudioPlan Web**
>
> My main project: development of a SaaS platform serving approximately 200 business customers.

Codex, Claude Code, DevOps, SaaS, Microsoft Azure, Liquibase, Next.js, React, RTK Query, Redux, Mantine, FullCalendar, Node.js, Vitest, Playwright

Grant Thornton Digital

January 2025 - January 2026

Software Developer & Consultant | Milan

I developed dashboards and data analysis features, structured a corporate SharePoint intranet with React components, and integrated OpenAI APIs.

React, SharePoint, Data analysis, Dashboard, OpenAI API, API integration

Sviluppiamo tutto

March 2024 - January 2025

Software Developer | Montefiridolfi (Florence)

I worked across responsive websites and back-office platforms, strengthening my knowledge of the Next.js stack.

Next.js, Responsive design, Back-office development

Open Reply IT

July 2021 - March 2024

Software Developer · FE Supervisor · Consultant | Milan

I provided B2B consulting across multiple clients, combining software development, front-end supervision, UX design and collaboration with technical teams and stakeholders.

> **Sky**
>
> Front-end and UX lead: designed and implemented a back-office interface for IoT devices supporting fibre and internet services. API integration, home device mapping, traffic visualisation and router configuration.

Intesa Sanpaolo

Maintenance, bug fixing and enhancements for an employee evaluation platform.

La Marzocco

Resolved issues in the integration between software and coffee machines.

Startup · Design system

Implemented Storybook to establish a design system for a small startup.

UnipolSAI Assicurazioni

Implementation, support and maintenance of a new insurance quotation platform based on a microfrontend architecture supporting React, Angular and Vue.

Mediaset Infinity

Worked closely with Mediaset's technical team on bug fixing, enhancements and change requests for Infinity.

React, TypeScript, Redux, AWS, API integration, UX design, IoT, Software integration, Troubleshooting, Storybook, Design systems, Microfrontends, Angular, Vue, Next.js, RTK Query, Zod, Playwright

Tipso S.r.l.

June 2021 - January 2023

Mobile Developer I Florence

I developed a mobile MVP with React Native and Firebase.

React Native, Firebase, Mobile development, MVP

Bitforce

January 2021 - April 2021

Front-End Developer I Montevarchi (Florence)

During my curricular internship I built a hybrid app with Ionic and Angular, integrated GraphQL APIs and strengthened my front-end skills.

Ionic, Angular, GraphQL, API integration, Hybrid apps
